

buynomics

DevOps Engineer (m/f/d)

Immediately / upon consultation

Full time

ABOUT US

We help our customers optimize their product portfolios and -prices, which significantly increases their profitability. Our SaaS solution precisely predicts customers' purchasing decisions by using artificial intelligence and behavioral economics. We have developed the most advanced pricing solution in the market. We received pre-seed funding in 2019, and we already have several large enterprise customers from telecommunications, consumer goods, insurance, and software who use our solution to optimize their pricing and product portfolio. With established product-market fit, we now want to build the team that takes buynomics to the next level and accelerates our growth in our target industries.

We are data-driven and results-oriented. We encourage transparent communication and personal growth. We create a modern and dynamic working environment with flat hierarchies assuring your direct impact. We are the commercial insights solution of tomorrow. We are buynomics.

Are you identifying yourself with these values and are you a self-starter, able to prioritize and strive to make an impact and working in a fast-paced and intellectually intense environment? Then join the buynomics team and become part of our success story!

ABOUT YOU

- You are a strong conceptual thinker with the ability to understand complex systems
- You care for customers' business needs and are able to translate them into a technical roadmap
- You have a passion to build a great product and care deeply about best practices for code quality, automation, and testing
- You have excellent organizational skills and a strong "hands-on" attitude

REQUIREMENTS

- Hands-on experience with AWS and deep understanding of its most critical services
- Good knowledge of Terraform
- Experience with building CI/CD pipelines (GitLab is a plus)

- Experience with Docker
- Experience with maintaining and scaling relational databases (RDS, Postgres is a plus)
- Experience building secure infrastructure
- Good communication in English (German is a plus)

OUR STACK

- Tech: TypeScript, Python, PostgreSQL, TypeORM, ReactJS
- Architecture: REST API (Microservices), AWS (Lambda, S3, Cognito)
- DevOps: Fully based on infrastructure as code, Docker, Kubernetes, CI/CD, Git

BENEFITS

- Competitive package, including the opportunity to earn shares
- Flexible hours with the option to work remotely
- Home office days (if co-located in Cologne)
- Learning benefits
- Open-door policy

Do you want to become a key part of the buynomics growth story and help us build a true champion in a fast-growing industry?

Please send us your application (CV and/or GitHub profile and/or Stack Overflow profile) to sebastian.baier@buynomics.com
